EXPERIENCE

Capgemini (Client: HSBC) — **India**
SDE-I – SIC IP Project — *Sept 2025 – Aug 2026*

- Contributed to LLD design for the Switzerland market payment journey, covering service flow and integration requirements
- Hands-on experience with GCP and Google Container Registry (GCR) for container image management.
- Set up and managed Prometheus and Grafana for application observability and monitoring.
- Worked on complex boxing and unboxing services involving data transformation and service integration.
- Performed production troubleshooting and root-cause analysis using logs and monitoring metrics.
- Planned and coordinated multiple production Change Requests (CRs), including deployment and validation.

Capgemini (Client: HSBC) — **India**
SDE-I – AU-PayTo Project — *Jan 2024 – Aug 2025*

- Designed and developed high-performance RESTful APIs for real-time mandate management using Java, Spring Boot, and Microservices.
- Designed and developed a Mandate Management Spring Boot service to handle and automate database operations.
- Enhanced and standardized a Spring Boot scheduler service, now adopted by multiple HSBC regions (including AU), and conducted demos for senior stakeholders.
- Engineered and optimized complex database services, refactoring procedures, improving query efficiency, and enforcing reusable, modular code design.
- Applied OOP, SOLID principles, and modern Java features to refactor legacy services, ensuring scalability and maintainability.
- Co-led the team alongside the Technical Lead—representing the team in client discussions, accelerating critical knowledge transfers, and mentoring new members.

Capgemini — **Remote**
SDE-I – Tech-COE Project — *Aug 2023 – Dec 2024*

- Built and enhanced Customer Onboarding module in the banking domain integrating heterogeneous API calls (REST, SOAP, internal services) using Spring Boot and Hibernate.
- Developed resilient API routing and transformation layers, enabling seamless communication between legacy SOAP services and modern RESTful endpoints.
- Implemented robust unit and integration test suites (JUnit, Mockito), ensuring reliability and alignment with OWASP secure coding standards.

SKILLS

Technical Skills: Java, Java 21, Python, JavaScript, TypeScript, HTML5, CSS3, React.js, Spring Boot, Spring MVC, Spring Security, Spring Cloud, REST APIs, Microservices, JDBC, JPA, Hibernate, CI/CD

Database & Messaging: Oracle Database, MySQL, PostgreSQL, MongoDB, Redis, Apache Kafka, SQL

Tools & DevOps: IntelliJ IDEA, Visual Studio Code, Git, GitHub, GitLab, Maven, Docker, Docker Compose, Kubernetes, Jenkins, GitLab CI/CD, Linux, Postman, Swagger/OpenAPI, JUnit 5, Mockito, SonarQube, Prometheus, Grafana, ELK Stack

Concepts & Fundamentals: Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Microservices Architecture, System Design, Data Structures & Algorithms (DSA), DBMS, Operating Systems, Computer Networks, Multithreading & Concurrency

AWARDS & CERTIFICATIONS

- Secure Code Warrior – HSBC (OWASP, Secure Coding) — **2024**
- Spring Boot & REST API Training & Certification — **2023**

EDUCATION

Graphic Era University, Dehradun | B.Tech in Computer Science — **Jun 2023**

- CGPA: 8.1/10.0
